**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7, 8, 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No clear antecedent basis is found for "said idler roller" in these claims.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 to 20, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Knudson.

The seaming rollers disclosed in Figure 9 of Knudson meet the requirements of these claims. The particular sheet metal article intended to be seamed is of no patentable consequence.

Separate base plates 26, 27 of Figure 2, to which the rollers are mounted, constitute first and second discontinuous planar surfaces, as required by Claim 17. One skilled in the art would appreciate that the handle-mounted trigger switch seen in Figure 4 would activate the motor to power the rollers.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morse et al. and Sanders further show the state of the art.
